

Biology 107 Enzyme Project Proposal

Please fill out one per group

Who are you? Please write your lab group (B-6, for example), and give the names and emails of all group members.

1. What is your question?

4. Write a detailed description (with drawings if necessary) of what you will do to collect your data.

2. Why is it interesting? What background information do you have on this question?

3. What is your hypothesis? What do you think your results will look like?

5. Write a detailed list of the materials you will need.
