SOLOS FOR TREBLE INSTRUMENT
ESPECIALLY SOPRANO RECORDER

COLLECTION 9
AMERICAN INDIAN MELODIES

Arranged by Clark Kimberling

Here you’ll find a treasure of free sheet music! Use the music however you wish – but always keep these two things:
• the attribution to arranger (top of page)
• the copyright notice (bottom of page).

Collection 9 has 60 solos. They are arranged especially to show the amazing capabilities of the soprano recorder, but they also play well on violin, flute, clarinet, oboe, and other modern instruments.

Many of the solos include newly composed contrasting segments, especially in cases of very short originals. The arrangements develop melodies through upward transpositions, ornamentations, and additions of note not found in the original melodies. To locate original versions, use Historical Notes 9 and Google.

When performing these arrangements, use a sound system and/or a percussionist.

A percussionist can work wonders – and manage your sound system.

The solos can be grouped in various ways to indicate their origins, purposes, and performance possibilities.

Melodies sung in connection with dances

- Alligator Dance Song (Seminole)
- Blackbird Dance Song (Seminole)
- Children’s Lightningbug Dance Song (Seminole)
- Circle Dance Song (Maidu)
- Cypress Swamp Hunting Dance Song (Seminole)
- Dancing Song of the Skunk (Mandan)
- Hinata Dance Song (Seminole)
Opening Song of Flower Dance (Maidu)
Social Dance Song (Maidu)
Song of the Duck Dance (Maidu)
Sun and Moon (Lakota)
Sun Dance Song (Arapaho)

Dream songs
Behold the Dawn (Lakota)
Dream of Buffalo (Lakota)
Dream Song (Ute)
Sun and Moon (Lakota)
A Yellow Star (Pawnee)

Warrior songs
Crow Indian, Watch Your Horses (Lakota)
Friends, Go On (Lakota)
I Have Conquered Them (Lakota)
Song of the Strong Heart Society (Lakota)
Those Are Not My Interest (Lakota)
We Cannot Turn Back (Cheyenne)
A Wolf I Considered Myself (Lakota)

Worship songs
La Framboise (Dakota)
Lacquiparle (Dakota)
Renville (Dakota)

Healing songs
An Appeal to the Bear (Lakota)
My Grandfather the Sun (Cheyenne)
Sitting Bull’s Medicine Song (Lakota)

Love melodies
Be Afraid, Indeed! (Dakota)
I Am Going to Marry Another Man (Cheyenne)
Scarlet Eagle (Dakota)
Why Should I Be Jealous? (Ojibwe)

Play songs and children’s songs
Ball Game Song (Seminole)
Children’s Lightningbug Dance Song (Seminole)
Higanyah (Cherokee)
Woman’s Game Song (Maidu)
Yo Wi Danuwe Yowide-Danuwe (Cherokee)
PLAYING THE SOLOS

The fact that these solos are unaccompanied heightens the opportunities for individual interpretation. The solos are free of dynamic markings, and considerable liberties may be taken with the suggested tempo markings.

Both recorder and flute are capable of a wide spectrum of articulation, ranging from slurring to extreme staccato-with-chiff, or staccatissimo so short as to be useful as a kind of pianississimo playing. In a few of the solos (e.g., La Framboise, Renville), passages are marked “staccatissimo” – but the interpretation of this and other articulations may vary greatly from one player to another.

Mordents, indicated by a short wavy line above or below a note, as in Behold the Dawn and Dream Song, usually mean three fast slurred notes (ABA in measure 24), but – where there is sufficient time and at the performer’s discretion – they may be stretched to five notes.

It is important, when soloing, to accent important notes in order to maintain a “beat.” This is especially true when a downbeat-note is preceded by a higher note, as in Father Gave Me a Pipe.

NOTES FOR RECORDER PLAYERS

Very high notes on a soprano recorder, beginning at high C (that’s c³, printed two lines above the treble-clef staff, pitched an octave higher), are listed here with fingerings. These are all played with half-open thumb hole.

The very high notes are best used in staccato playing, and then, sparingly, usually near the end of a piece, as in Híganúyahí and Woman’s Game Song. A philosophical approach to the high notes is that they should be cultivated for the simple reason that they are “there” – with their own kinds of musical possibilities, just as the notes on various ethnic flutes offer their own special characteristics.
Many recorder players use a modern vibrato, based on diaphragm or throat motion, or some combination of those two. Players apply vibrato to music composed after 1800 in much that same way that flautists, violinists, and vocalists do. Well-modulated vibrato is highly recommended for the solos in this collection. Tones that are held for more than one second, such as a high note at the end of a phrase and especially at the end of a piece, may be played in the manner of many vocalists: start the tone straight, then develop vibrato gradually over a short time interval, until full vibrato is “on” for most of the duration. See Whistle Melody for special attention to vibrato.

At least two other special effects should be cultivated by recorder players: chiff and recorder-glissando. The word chiff (from the sound made by the chiff-chaff, a European warbler) is often applied to sounds made on certain pipe organs, especially fine tracker organs, as well as electronic organs that explicitly offer a chiff option. While chiff is possible on almost all the notes of a soprano recorder, it is fairly easy to produce truly remarkable chiffs in the lowest octave. In fact, one may speak of octave-chiff for these lower notes, obtained by plosive overblowing “just right.” As the name suggests, the attack on the note actually causes the note an octave above to sound briefly, like an accented grace-note. Chiffing can add quite an intriguing percussive effect; as in Be Afraid, Indeed; Tukuminguak’s Song; Woman’s Game Song; and many others.

The other special effect, recorder-glissando, is denoted by a straight segment between two notes. Ascending recorder glissandi work especially well between certain pairs of notes, such as e² to g² and e² to a². Descending favorites are d² to d¹ and d² to f¹. To perform these, simply roll the fingers gradually from one fingering to the other. Examples: Song in Honor of Gabriel Renville. Recorder-glissando differs from ordinary glissando, in which intermediate scale notes are rapidly fingered and slurred, as in An Appeal to the Bear and Ball Game Song.

NOTES FOR FLUTE PLAYERS

Bottom C on a flute is middle C on a piano, but when a soprano recorder plays the same written note (the lowest on the instrument), the sound is actually an octave higher. In other words, loosely speaking, the recorder plays an octave higher than the flute. Consequently, music written for soprano recorder, when played on flute, is pitched a bit lower than most flute music. When played as written on flute, the solos in this collection have a pleasing low effect and, in some cases, may be regarded as specialized flute music, especially if amplified by a sound system.

INVITE A PERCUSSIONIST

Many of the solos lend themselves to the sort of accompaniment that skilled percussionists can easily provide. Feel free to use your own recorded background sounds (perhaps managed by your percussionist).

Keep in mind that a drum was almost always used when an American Indian sang a solo, and several drums were used during dance songs.
Foot-tapping can be used during many of the solos in the collection, and it is explicitly called for in Behold the Dawn, The Legend of Superman and Coyote, Opening Song of Flower Dance, and Song in Honor of Gabriel Renville.

**ARRANGEMENTS**

In order to adapt melodies as originally published, certain techniques of arrangement have been applied. One objective has been for each finished arrangement to occupy a full page, and another has been that each arrangement should take advantage of special characteristics of the recorder or flute. Perhaps the most obvious technique for such objectives is upward transposition, as in Blackbird Dance Song, Katcina, and Lacquiparle.

A second technique is the *contrasting phrase*; that is, one that separates renderings of the original melody. Take a look, for example, at Woman’s Game Song: the original melody occupies measures 1-17; then a contrasting phrase (18-27) bridges to a second appearance of the melody.

Another technique is *chording*. With a one-note-at-a-time instrument, chords, in the usual sense, are not available. However, playing the notes of chords rapidly in succession can achieve desirable harmonic effects and also enhance a melody in other ways. Examples: Father Gave Me a Pipe, Híganúyahí Hinata, and Dance Song.
For a list of all the solos, consult **Historical Notes 9**, which includes Internet links and provides access to all 12 collections in this series:

Collection 1: African-American and Jamaican Melodies  
Collection 2: Christmas Carols  
Collection 3: Irish Melodies  
Collection 4: Americana to 1865  
Collection 5: Americana after 1865  
Collection 6: British Melodies  
Collection 7: Melodies by Women Composers  
Collection 8: Eastern European and Jewish Melodies  
Collection 9: American Indian Melodies  
Collection 10: Latin American Melodies  
Collection 11: African Melodies  
Collection 12: Western European Melodies
