**Theorem.** *Suppose that  $T_1 = U_1V_1W_1, T_2 = U_2V_2W_2$  and  $T_3 = U_3V_3W_3$  are three triangles such that:  $U_1, U_2, U_3$  are collinear,  $V_1, V_2, V_3$  are collinear and  $W_1, W_2, W_3$  are collinear. Let  $Vn_{12}, Vn_{23}, Vn_{31}$  be respectively the Vietnamese points of  $(T_1, T_2), (T_2, T_3), (T_3, T_1)$ . Then  $Vn_{12}, Vn_{23}, Vn_{31}$  are collinear.*
